

JD3 Jewelry Custom pricing

JD3 Jewelry custom designs and manufactures each piece of jewelry. Our designs are unique and are made in our Full service manufacturing workshop and custom design studio. To give a price on a custom piece of jewelry we first need to know the size and amount of diamonds and or gemstones in the piece of jewelry as well as the precious metal the design is to be made with. This is why jewelry shown on our website does not include pricing.

Unique Jewelry for a unique person

Engagement Ring Design Process

JD3 designs engagement rings and wedding bands by appointment only to give you the attention to detail you deserve. Our first meeting we will determine the size and shape of the center diamond you desire as well as a budget you wish to stay within. I will then have your diamond shipped to JD3 from a number of diamond cutter we purchase from around the globe. This is how I keep cost on diamonds low by not stocking large amounts of diamonds therefore keeping overhead low. Your diamond will be kept in a secure vault until it is set into your custom made ring. Next the ring will be designed around the center diamond in CAD (computer aided design) for an exact fit cad design is quicker and more exacting than making the ring by hand. The cad program also will give a price of the precious metal to be used in making your ring. Once the cad is completed you will be shown a rendering of your ring for your approval. Once approved by you the ring will be milled from a solid block of wax using the design that was made in cad. After being milled, I now have an exact wax model of your ring to cast in the precious metal of your choice. After casting the ring it will be pre-polished and have all diamonds set by our diamond setter. After the diamonds are set in the ring it can be then polished to a high shine and placed in a rosewood box for you. All JD3 Jewelry custom designs are guaranteed we stand behind all the work we perform. We recommend after care on your new ring. Every six months your ring can be brought to JD3 Jewelry to check prong tightness as well as cleaning and polishing. JD3 wants you ring to look great and last generations.
